

```
// jQuery POST

$.ajax({
  settings: {
    url: 'http://api-to-call.com/endpoint',
    type: 'POST',
    data: JSON.stringify({id: '200'}),
    dataType: 'json',
    success(response) {
      // Code to execute with response on success
    },
    error(jqXHR, status, errorThrown) {
      // Code to execute with response on failure
    }
  });
}
```

handles response if successful

handles response if unsuccessful
