```
// jQuery GET

$.ajax({
  url: 'http://api-to-call.com/endpoint',
  type: 'GET',
  dataType: 'json',
  success(response) {
    // Code to execute with response on success
  },
  error(jqXHR, status, errorThrown) {
    // Code to execute with response on failure
  }
});
```

settings — { url, type, dataType }

handles response if successful

handles response if unsuccessful
